To View a source on the screen:

1. Press Power ON button
2. Wait for the projector to warm up.
3. From the source buttons choose the INPUT: Computer, Video, S-Video, Component, or HDMI.
4. For DVD / VCR, insert media and use the control buttons on the deck to play or stop your video.

Note: Make sure the laptop’s external monitor port is on.
If the image appears on the laptop and not on the screen, you may need to activate the external display port on your laptop (Usually by pressing the Fn and F7 keys together). Consult your laptop owner’s manual for specific directions.

Volume

Turn volume knob on speaker to adjust audio.

Exit

Turn power OFF on Smart Board
