Media

To View a source on the screen:
Press Projector ON button
1. Wait for the projector to warm up.
2. From the source button choose the INPUT: Computer 1 or 2, Video, S-Video, Component, or HDMI.
3. For DVD / VCR, insert media and use the control buttons on the deck to play or stop your video.
4. For PC or Laptop, press the AUTO Adjust button if the image does not appear correctly on the screen.

Note: Make sure the laptop's external monitor port is on. If the image appears on the laptop and not on the screen, you may need to activate the external display port on your laptop (Usually by pressing the Fn and F7 keys together). Consult your laptop owner’s manual for specific directions.

Volume

Turn volume knob on speaker to adjust audio.

Exit

Turn power OFF on projector and multi-outlet strip.
