Teachers College, Columbia University  
Department of Biobehavioral Sciences  
Program in Speech and Language Pathology

Faculty Member in Speech and Language Pathology

**Position:** Scholar with primary interests in speech production in individuals with or without communication disorders. The position is for a specialist in areas of speech disorders such as fluency disorders, neurogenic speech disorders, school based speech and language pathology, or medical speech pathology.

**Responsibilities:** Teach graduate courses in speech-language pathology, conduct and supervise research in areas of interest and expertise, advise masters and doctoral students, and provide service to the Department and College.

**Qualifications:** Earned doctorate; evidence of potential for, or record of excellence in university teaching and in research, certification in Speech-Language Pathology (CCC-SLP), and eligibility for New York State license in speech-language pathology. The successful candidate will have the ability to teach across several areas of speech-language pathology, such as (but not limited to) motor speech disorders, fluency disorders, voice, or dysphagia.

**Rank:** Assistant Professor, tenure-track.

Send a letter of application, a CV, and the names and contact details for at least three references, to Professor Karen Froud, Search Committee Chair, Department of Biobehavioral Sciences, Teachers College, Columbia University, Box 180, 525 W. 120th Street, New York, New York 10027.

Review of applications will begin November 24th, 2009, and will continue until position is filled.

*Teachers College as an institution has long been committed to a policy of equal opportunity in employment. The College is committed to providing expanding employment opportunities to minorities, women and the disabled in its own activities and in society.*
