These essays are critical contributions to the field of peace-building and conflict resolution because of the scholarly depth and profound insight into understanding the way conflict is framed, analyzed and transformed. These prominent scholars set an excellent standard of understanding violence, conflict reduction, conflict prevention, religion and conflict resolution, and what human beings must do to repair broken relationships. It is an indispensable volume for practitioners, students, and scholars - a text that will be used for years to come.

The Arabic translation of the Handbook of conflict Resolution Theory & practice by M. Deutsch, P.T. Coleman, & E. Marcus is very necessary. I strongly recommend the use of these essays for both students and the practitioners interested in the area of Conflict Resolution.

“Morton Deutsch, Peter Coleman, and Eric Marcus put together a handbook that will be helpful to many. I hope the book will reach well beyond North America to contribute to the growing worldwide interest in the constructive resolution of conflict. This book offers instructive ways to make this commitment a reality.”
