As of **03/26/2019**
Course Descriptions:

• **ITSF 4018, Anthropology/Development in Africa**
  This seminar considers issues and problems of development in sub-Saharan Africa. It examines specific development projects from different theoretical and empirical perspectives.

• **ITSF 4026, Technology, Culture, Education**
  An exploration of the impact of technology broadly defined upon cultural evolution as currently discussed in anthropology and related disciplines.

• **ITSF 4034, Dynamics of Family Interaction:**
  An introduction to communication patterns inside families, with a special emphasis on both their complexity at the interpersonal level and their simplicity within the social structure of a community. Class time is dominated by cross-cultural data on family structure and videotape analyses of communication patterns within American families.

• **ITSF 5000 Method Inquiry: Ethnography:**
  This course examines the methods of the social sciences as they relate to ethnography and participant observation. The course emphasizes the role of theory, characteristics of various research techniques, and the importance of integrated research design. The course provides opportunities to practice ethnographic research techniques, including developing a research question, designing a study, interviewing, conducting observations, and analyzing data. There are no prerequisites.
