Online Learning vs. Face to Face Learning

01 Flexibility
Class work can be scheduled around work and family.

02 Discipline
Effective time management skills are essential to staying motivated and on task when learning outside a physical classroom.

03 Interaction
Social interaction with instructors and peers may happen via video conferences, chat, or online discussion posts, but can be asynchronous. Keep checking announcements and reach out to the instructor and your classmates proactively when you need help.

04 Pace
You can find a pace that works best for your individual learning style and needs, but you have to be very mindful of the deadlines.
